#### (b) WEIGHTS.

- 1 dirhem = 48·14 grains—3·205 grammes.
- 1 okka (oke) = 400 dirhems—1·248 kilogrammes—2·751 lbs.

## SECTION XIII.

# INDUSTRY AND PRODUCTION, WAGES AND COST OF LIVING.

## INDUSTRY AND PRODUCTION.

Palestine is essentially an agricultural country, and it is only since the British occupation that industries have begun to develop. Before the war the manufacture of wine was the only industry existing on a large scale, and a few factories in Nablus and elsewhere made soap from olive oil by simple processes.

The production of wine and liquors as assessed in 1925 and 1924 was as follows :—

	1925. Kilos.	1924. Kilos.
Dry wine .. .. .	1,035,523	830,838
Sweet wine .. .. .	1,123,343	634,115
Arak .. .. .	138,858	69,948
Cognac .. .. .	34,356	40,905
Other liqueurs .. .. .	13,183	6,974

## TOBACCO GROWING.

The remarkable enthusiasm displayed for tobacco planting during 1924 resulted in the production of a crop largely in excess of local requirements. A large surplus caused an inevitable reaction, and the area planted with tobacco decreased from 27,137 dunums in 1924 to 11,676 dunums in 1925. This, however, may prove a blessing in disguise by ensuring the production of higher-grade tobacco leaf. The production of tobacco decreased from 1,845 tons in 1924 to 678 tons in 1925.

## INTRODUCTION OF NEW AGRICULTURAL STAPLES.

The introduction of new staples promising higher acreage results is being organised by the Department of Agriculture, selection being made of crops the production and preparation of which call for no considerable outlay on machinery and no special expenditure except for labour. Oil seeds, such as ground nuts, linseed, sunflower and soya beans, and fibres such as cotton, flax and hemp, which find a ready market locally in oil and textile mills, soap factories, etc., are being encouraged. The past season was not favourable from a weather point of view, but good results were obtained at forest nurseries with ground-nuts, flax, and sunflowers, where a deficient rainfall was supplemented by irrigation. Banana cultivation is increasing. Subsidiary industries for the production of perfumes, medicinal barks, etc., have been established. Liquorice roots from the Jordan Valley are in good demand.

## INDUSTRY.

Early in 1925 industrial conditions were favourable and a number of important factories were established. A silk-weaving factory, cotton-spinning and a steam tannery commenced operations at Tel-Aviv.

A match factory at Acre, a cement factory at Haifa, and a factory for the distillation of essential oils and the manufacture of perfumes was opened at Benjamina.

## POWER.

The most important stimulant to local industry has been the establishment of electrical power stations at Tel-Aviv, Haifa and Tiberias (the latter two in 1925) by the Palestine Electric Company, Ltd., and the Palestine Electric Corporation, Ltd. So great has been the demand for electricity at Tel-Aviv and Jaffa, that the two engines, each of 500 h.p., which were first installed in the power station here had to be supplemented by a third one of 250 h.p., and later by a fourth of 1,000 h.p. Electricity is now also supplied from the Tel-Aviv station to Petah-Tikvah, the largest Jewish colony in the neighbourhood. It is expected shortly to start work on the establishment of hydro-electric power from the Jordan. The first hydro-electric station will produce 24,000 h.p. for 24 hours a day ; others can be added as conditions may demand, up to a total output of 300,000 h.p.

## THE SOAP INDUSTRY.

The soap-making industry, the most important of the pre-war industries with the exception of wine manufacture, is progressing, and new methods and machinery are being introduced by manufacturers. The production is increasing, and during 1925, 5,855 tons of laundry soap, valued at £E.247,725, were exported, showing an increase over the previous year of 1,046 tons, valued at £E.43,834. Toilet soap of an improved quality is now being manufactured. The "Shemen" Oil Company at Haifa, a modern factory established with a capital of approximately £E.250,000, commenced manufacturing laundry and toilet soap on a limited scale. A number of small soap factories have been established during the year in Tel-Aviv and Jaffa.

#### BUILDING MATERIALS.

This industry had a relatively satisfactory year, although it has suffered considerably from the decline towards the end of the year in the building operations. The Portland Cement Company "Nesher" of Haifa commenced operations in October. The cement produced by this factory compares favourably with foreign brands. The capital invested is approximately £E.300,000, and the factory can produce 60,000 tons a year.

#### FLOUR MILLING.

Flour milling is progressing. The Grands Moulins de Palestine erected an additional factory for the manufacture of Matzot (Passover bread). Prospects for this new enterprise are good.

#### TOBACCO AND CIGARETTE MANUFACTURE.

Seven tobacco and cigarette factories and seven tobac factories were working regularly in 1925. Over 300 tons of cigarettes were manufactured. The industry is progressing steadily, but a certain amount of tobacco is still smuggled into the country, with a resulting loss to manufacturers and to the revenue.

#### SALT PRODUCTION.

The sale of salt is a Government monopoly. A company is producing salt at Athlit by the evaporation of sea water in artificial basins. The output of this company was 5,500 tons of salt in 1925, as compared with 2,600 tons in 1924. Sales of salt by the Government amounted to 4,794 tons in 1925, as compared with 3,457 tons in 1924.

#### FURNITURE MAKING.

Competition, particularly from Syria, is very strong ; but the industry is making headway.

#### TEXTILES AND SILK.

The only factory now working at anything approaching capacity is the "Lodzia" textile factory, employing about 100 hands, and manufacturing hosiery and underclothing from imported yarns.

The Delfiner silk factory, which opened early in 1925, closed down, but has recently been re-opened.

#### ALCOHOL MANUFACTURING.

Three factories are producing alcohol in the country ; these have formed a syndicate in order to reduce the cost of production and eliminate competition. The production was 52,456 kilos. of alcohol in 1924 and 261,894 kilos. in 1925.

#### MOTHER-OF-PEARL INDUSTRY.

The Bethlehem industry progressed during the year owing to the success it obtained at the British Empire Exhibition, where important sales of curios and articles of piety were effected.

#### MATCH MANUFACTURE.

There are two match factories in Palestine, one at Acre and the other at Tel-Aviv. The industry is hampered by the high cost of production.

#### GENERAL.

Over 700 small industrial concerns are at work manufacturing all sorts of goods. There are brass and iron foundries, printing presses, and factories manufacturing confectionery, pottery, and furniture, and many persons are employed in other trades. Industry in Palestine is still in an embryonic stage and is handicapped by the lack of raw materials, the relatively high cost of production, and transport. Long-term industrial credits are lacking. The more important industries were not seriously affected by the financial depression of the latter part of the year, and prospects for the future are promising for those industries which can obtain their raw materials in the country.

#### PROMOTION OF TRADE AND INDUSTRY.

Most of the new industries find their development retarded by the high cost of living, with its corollary of a high cost of production, and many of them ask for measures of protection. The Government policy in these matters has been to grant customs exemption in respect of raw materials, and to assist the development of the export trade.

Olive oil for industrial purposes, caustic soda, various seeds for the extraction of oils, hides and skins, dyes, cotton, woollen and silk yarns, mother-of-pearl shells, sulphur, printers' types, tools and implements, bottles, etc., were exempted from customs import duty during the year in order to encourage local industries. The export duty on all articles, with the exception of antiquities, was abolished early in 1926.

With a view to encouraging agriculture, the land tax on tobacco has been abolished, and the tithe on cotton suspended for a certain period, and the agricultural tithe has been reduced from 12½ to 10 per cent.

\*—Owing to the wide variations in rates it is difficult to calculate a reasonable average for skilled and unskilled workers in industry. The industrial situation is unstable and this reacts upon wages ; moreover, differences in the size of industrial units, and the cultural and social distinctions in employers and employed cause rates to diverge sharply, although a growing approximation between the wages of Jewish and non-Jewish workers is apparent. The higher money wages of Jewish workers, however, do not in many cases reflect a higher level of real wages.

### CUSTOM HOUSE DECLARATION.

Two custom declarations must be attached to the Despatch Note of every foreign parcel.

### UNDELIVERABLE PARCELS.

Undelivered parcels are disposed of according to the sender's instructions on the reverse side of the Despatch Note. When such instructions are not furnished the parcel is returned to origin at the expiration of one month from the date of receipt in Palestine.

### EXPRESS DELIVERY.

Express delivery facilities are available in Jerusalem, Jaffa, Haifa and Tel-Aviv only.

### FREE DELIVERY.

Letters and packets are delivered free by postman.

### COLLECTION OF TRADE CHARGES.

#### REMBOURSEMENT SYSTEM.

A "Cash on Delivery" Parcel Post Service with Great Britain only is in operation. So far as posting in Palestine is concerned, the service is at present confined to the Offices of Jerusalem, Jaffa, Haifa, Nazareth and Bethlehem. In the service with Great Britain "Cash on Delivery" parcels may be addressed to any destination in Palestine.

### FEES PAYABLE.

The sender must prepay, by means of postage stamps affixed to the Despatch Note, a special Cash on Delivery fee at the rate of 1 per cent. of the amount of the Trade Charge plus a fixed fee of 10 m/ms per parcel. These fees are additional to the ordinary postage and other charges.

### INSURANCE OF PARCELS AND BOXES.

The maximum amount for which a parcel can be insured is £E.119. A parcel may not be insured for an amount exceeding the real value of the contents and the cost of packing.

Insured parcels must be very strongly packed and sealed in accordance with the regulations.

The fee for insurance, including registration but in addition to the ordinary postage, is 20 m/ms for the first £E.12 or part thereof of the insured value and 7 m/ms for each additional £E.12 or part thereof.

Every insured parcel containing coin or bullion, watches, precious stones, jewellery, or any article of gold or silver, must be closed in a strong box or case (measuring, if the contents are jewellery exceeding £E.100 in value, at least 105 centimetres in length and girth combined), must be sewn up, or otherwise fastened, in a wrapper of linen, canvas, strong paper, or other substantial material and must have the address written on its actual covering. The seals must be placed along the edges of each join or loose flap at distances of not more than 75 millimetres apart.

Parcels may not exceed 5 kilogrammes in weight except in the case of parcels for Great Britain and Syria.

The maximum length allowed is 105 centimetres.

The maximum length and girth combined, 180 centimetres.

Parcels addressed to foreign countries should generally be packed in tin, strong wood, canvas, linen or similar material and with due regard to the length of journey, conditions of transit, climate, etc., not merely in paper or cardboard, in a manner calculated adequately to protect the contents from damage through contact with other parcels.

An Advice of Delivery of a registered or insured parcel may be obtained on payment of the sum of 13 m/ms either at the time of posting or subsequently.

### INSURED BOX SERVICE (FOREIGN ONLY).

Articles of gold and silver, precious stones, jewellery and other articles of a like nature which are prohibited from transmission in insured letters, may generally be sent in the LETTER MAILS as insured boxes.

The undermentioned classes of articles are prohibited from transmission in insured boxes to Great Britain :—

Clocks, watches and the principal parts thereof.

Cinematograph films ; letters or notes which may serve as a substitute for correspondence. Current coin, bank-notes, securities payable to bearer, bonds and articles included in the category of commercial papers. It is, however, permissible to insert in the packet an open invoice and also a simple copy of the address of the packet and the sender.

### INSURED BOX SERVICE—*continued.*

An insured box must not exceed 1 kilogramme in weight or measure more than 30 centimetres in breadth and 10 centimetres in depth. The sides of the wooden box must be at least 8 millimetres thick.

It must be tied round cross-wise with a single strong string (not two or more pieces joined together), the two ends of the string being held firmly together under a seal of fine wax bearing a private mark. All seals on the four sides of the packet must be identical with that used for sealing the ends of the string.

The boxes must not be wrapped in paper.

Insured boxes are subject to the Customs Regulations and must be accompanied by the appropriate forms which should be most carefully prepared.

No box can be insured for more than its actual value or the limit of insurance allowed.

Postage and insurance fee must be fully prepaid.

The rate of postage is 8 m/ms per 50 grammes with a minimum charge of 40 m/ms. The fee for insurance and the limits of insurance are the same as for insured letters to places abroad.

An Advice of Delivery of an insured box may be obtained on payment of a fee of 13 m/ms either at the time of posting or subsequently.

## HOUSE AND LAND TAX

The House and Land Tax is assessed on the capital value and is levied at the following rates :—

	per mille.
(1) Property not built upon :—	
(a) Lands, fields, vineyards, gardens, subject to tithe, or to the equivalent of tithe (Badl-ushur), or changed into land of the muqataa category ..	4
(b) Land destined for building purposes ..	4
(c) Lands not paying tithe, nor paying the equivalent of tithe, nor changed into muqataa land ..	10
(2) Property built upon :—	
(a) Farm buildings .. .. .	4
(b) Farm buildings hired and occupied by tenants not exceeding 200,000 mils. capital value ..	5
(c) Farm buildings hired or occupied by tenant not exceeding 200,000 mils. capital value ..	8
(d) Farm buildings within the area of a town or village ..	5
(e) Wakf buildings (mussaqaafat waqfiyeh) ..	4
(f) Houses inhabited by the proprietors, the value of which is below 200,000 mils. ..	5
(g) Houses inhabited by the proprietors, the value of which is over 200,000 mils. ..	8
(h) Buildings leased or rented by their owners ..	10

Additions to this tax aggregating 41% on buildings and 56% on lands were made from time to time under Ottoman Decrees. These additions are still collected, except in the case of buildings and lands re-assessed since 1919.

In the townships of Haifa, Acre and Shefr Amr, a roofed property tax is levied in lieu. This tax is assessed at 3 1/3% of the gross income of buildings with the exception of farm buildings, which are exempt.

Exemption is granted in respect of the buildings of recognised Charitable and Religious Institutions and buildings and playgrounds owned and maintained by recognised Educational Institutions, provided the buildings are used solely for charitable, religious or educational purposes and are not revenue producing.

The urban property tax provides for the assessment of the net annual value of immovable property in urban areas with a view to the imposition of a tax to replace the House and Land Tax (Werko) and the tax on buildings (Musaqaafat). The new tax will be payable by the reputed owner of the property at such annual rates, not exceeding 10 per centum of the net annual value of house property and land, as may be prescribed for the various categories of property. The Ordinance also provides for a general re-assessment every fifth year.

## TITHES.

The tithe is imposed on the produce of the land at the rate of 10 per cent. and is collected in money. In 1927 experiments were made in certain villages for the substitution of the annual assessment of the tithe on crops by a commuted tithe based on the average aggregate amount of tithe assessed as payable during the preceding five years, apportioned among reputed owners of titheable land in proportion to the potential productivity of their holdings as ascertained by Village Assessment Committees. In 1928 the application of commutation of the tithe was extended to the greater part of Palestine.

Exemption from the tax is granted in respect of fuel wood, vegetables which cannot be preserved, vines grafted on American stock for ten years after planting, cotton, hay grown on village pasture lands.

## SECTION VII.

### MUNICIPALITIES AND OTHER LOCAL BODIES

1. There are 22 Municipalities in Palestine, of which 10 are in the Northern District, 8 in the Southern District and 4 in the Jerusalem Division. All Municipalities were created under the Ottoman regime and were governed by the Ottoman Wilayet Municipal Law of the 5th October, 1877.

2. Election to Municipal Councils is now regulated by the Municipal Franchise Ordinance, 1926.

The qualifications of voters are :—

- (b) Not less than 25 years of age.
- (c) Not to have been sentenced to a term of imprisonment of one year or upwards.
- (d) A payment, within 12 months preceding the date of the preparation of the Register of Voters of tax to an annual amount of at least 500 mils on immovable property owned within the Municipal Area ; or payment of Municipal rates to an amount of at least £P.1 ; or separate occupation of premises within the Municipal Area on which rates to that amount have been paid within the preceding 12 months.

3. Qualifications of members of the Council are :—

- (a) A place of residence within the Municipal Area.
- (b) Not less than 30 years of age.
- (c) A payment within 12 months preceding the date of the Ordinance of taxes of at least £P.1 on immovable property owned within the Municipal Area, or of municipal rates to an amount of at least £P.2, or separate occupation of premises within the Municipal Area on which Municipal rates to an amount of at least £P.2 have been paid within the preceding 12 months.

- (e) Not to have an interest directly or indirectly in any contract with, by or on behalf of the Municipality.
- (f) Not being a paid officer of the Government or Municipality.

4. The functions, powers and duties of Municipal Councils are derived from and imposed by the Ottoman Wilayet Municipal Law, 1877 (principally Sections 3 and 62) as amended by the Municipal Councils Validation Ordinance, 1925 and certain Ordinances enacted since the British Occupation in 1920. The latter Ordinance requires each Council to prepare a budget each year showing the estimated revenue and expenditure and to submit it to a District Commissioner for the approval of Government. It also validates the acts of Municipal Councils appointed since the British Occupation and the imposition of any rates and taxes and the charging of any fees by such Councils.

By the Municipal Loans Ordinance, 1922, Municipal Councils are empowered, subject to the approval of the High Commissioner, to raise loans secured on the property and revenue of the Councils.

The Municipal Courts Ordinance, 1928, empowers the High Commissioner to appoint fit persons of education and standing to be Magistrates of a town. He may, on the recommendation of the Chief Justice, appoint as Chairman of a Municipal Court a Stipendiary Magistrate. Cases within the jurisdiction of the Court are tried by a bench consisting of not less than two members but the Stipendiary Magistrate may try any case sitting alone. The jurisdiction of these Courts extends to any offences against Municipal Regulations and Bye-laws or any offences committed in a Municipal Area which are specified in Chapter III Articles 254 to 265 inclusive of the Ottoman Penal Code or in the following Ordinances,

- (a) The Public Health Ordinance (No. 1), 1918;
- (b) The Road Transport Ordinance, 1927 and the Road Transport Amendment Ordinances Nos. 3 and 20, 1924, and No. 38, 1925.
- (c) The Town Planning Ordinance, 1921;
- (d) The Intoxicating Liquors and Public Entertainments Ordinance, 1922, and
- (e) The Regulation of Trades and Industries Ordinance, 1927.

The Court is entitled to pass a sentence not exceeding a fine of £P.5 or imprisonment for fifteen days or both these penalties.

Appeal from conviction by a Municipal Court lies to the District Court as of right where the sentence is one of imprisonment, and by leave of the President of a District Court where a fine has been imposed.

5. The revenues of Municipalities are drawn from the following sources —House rates varying to a maximum of 10%, fees for licensing of stalls and booths and street traders, dogs, establishments selling intoxicating liquors, public entertainments, trades and industries, machinery, signboards ; fees for building permits, slaughtering of animals, leases, advertisements, and for specific services ; rents of municipal property ; contributions for the installation of drainage and for the construction of pavements ; auction dues ; grants-in-aid from Government.

## LOCAL COUNCILS.

---

The Local Councils Ordinances Nos. 1 and 2 of 1921, empower the High Commissioner on the recommendation of a District Commissioner by an order published in the Official Gazette to declare that any large village, quarter of a town having a distinctive character, or group of villages shall be administered by a Local Council.

The order may prescribe the composition of the Council.

Councils are invested with juristic personality, and may raise a loan secured on their property and revenues, with the approval of the High Commissioner.

Councils can levy rates on the property of the village or quarter with the sanction of the District Commissioner, and may impose, also, a poll tax on the inhabitants and certain fees for licences or otherwise which are authorised by the Law of Municipal Taxation in force from time to time. The rates and fees which may be imposed or charged by any Council are set out in the Order constituting each Council. Under the Regulation of Trades and Industries Ordinance, 1927, a Local Council is given the same powers as a Municipal Council with regard to the regulations of trades and industries carried on within its area which affect public health and public security.

30 Local Councils have been declared in Palestine, 17 in the Northern District, 9 in the Southern District and 4 in the Jerusalem Division.

## SECTION XVIII.

### CURRENCY, BANKING, WEIGHTS AND MEASURES, CALENDARS, LANGUAGES.

#### CURRENCY.

It was declared by Public Notice that as from the 22nd January, 1921, the following currency only should be legal tender in Palestine :—

Egyptian gold, notes, silver and nickel coins, and the British sovereign at the rate of 97.50 piastres Egyptian. No restriction, however, is placed on the circulation, in the ordinary course of trade, of coins of other currency at their current market rates.

The Order-in-Council dated the 7th February, 1927, Currency Notes Ordinance, 1927, and the Proclamation by the High Commissioner under Section 11 (2) of the Order-in-Council provide for the introduction of a Palestine currency consisting of coins and currency notes with effect from the 1st November, 1927. Other legislation relative to currency is contained in the Currency Substitution Ordinance, 1927, the Coinage Ordinance, 1927, and the Bank Notes Forgery Ordinance, 1927.

A Currency Board has been constituted to provide for and to control the supply of currency, to ensure that the currency is maintained in satisfactory condition and generally to watch over the interests of Palestine as far as currency is concerned. The Board makes arrangements for minting of coins, printing of currency notes, and investment of the funds of the Board.

The Board authorises the issue of currency in Palestine against repayment in London ; and arranges for issue, against currency tendered in Palestine, of drafts or telegraphic transfers payable in sterling in London.

The proceeds of the sale of coin and currency notes and all other revenue of the Board are, after the necessary deductions have been made for all expenses and for any contributions made to the revenues of Palestine, credited to a Currency Reserve Fund, and any losses which may be incurred are debited to the Fund. Any contribution to the revenues of Palestine is made after the Board and His Majesty's Secretary of State for the Colonies are satisfied that the reserves are adequate to ensure the convertibility of the currency and to provide a reasonable reserve against depreciation of investments.

The standard of currency is the Palestine Pound divided into 1,000 mils. The Palestine Currency Order provides for a gold coin of one Palestine Pound containing 123.27447 grains of standard gold (the equivalent of the English Pound) : it is not intended at present to introduce gold coins. Silver coins of 100 and 50 mils, nickel-bronze coins of 20, 10 and 5 mils, and bronze coins of 2 and 1 mils are in use. Silver coins are legal tender for the payment of £P.2, nickel-bronze coins of 20 and 10 mils are legal tender for the payment of any amount and not exceeding 200 mils, and coins of lower denominations are legal tender for an amount not exceeding 100 mils. Currency notes of £P.100, £P.50, £P.10, £P.5, £P.1, and 500 mils are in use and are legal tender of the amounts expressed therein.

The Currency Board is represented in Jerusalem by the Treasurer of Palestine and by Barclays Bank (Dominion, Colonial and Overseas, Ltd.).

Egyptian gold, notes, silver and nickel coins, and the British gold sovereign have by Proclamation been declared not to be legal tender after the 31st March, 1928.

Imports in 1923-1925 are classified according to the countries of origin, viz. the countries where the goods were manufactured.

Imports in 1926-1928 are classified according to the countries where the goods were last owned. Thus British goods purchased in Egypt or Syria are entered under Egypt or Syria as being the countries of consignment.

## TRADE.

The value of imports was £P.6,770,818, compared with £P.6,184,444 in 1927 ; and of exports of Palestine produce £P.1,487,207, compared with £P. 1,899,759 in 1927. The decrease in exports was chiefly due to the almost complete failure of the crops after the severe drought.

Imports of food, drink and tobacco increased by £P.169,004 over 1927, and exports decreased by £P.443,104 ; but it is gratifying to observe that exports of locally manufactured goods were again larger.

The diminished purchasing power of the rural population is reflected in a decrease of £P.133,142 in respect of cotton piece goods.

The labour market was, however, active ; and many unemployed were absorbed into industry, by building, and in new orange-groves. So, too, the general financial situation was easier and fewer bills were protested, although several failures took place towards the end of the year, with liabilities amounting to about £P.70,000,—apparently the outcome of land speculation in 1924 and 1925.

## ORANGE EXPORTS.

2,202,435 cases, value £P.648,678, were exported, compared with 2,658,249 cases, value £P.813,574, in 1927 ; this decline is attributable to drought. Exports to Europe continue to improve. 143,419 cases were shipped to Germany, 57,100 to Roumania, 20,815 to Denmark, 9,406 to Holland, 8,433 to France, and 5,000 to Bulgaria. Smaller consignments were shipped to Poland, Turkey, Australia and China. The balance was consigned to the United Kingdom. The prices ranged from 15/- to 24/- a case. In the United Kingdom a scarcity of the Spanish fruit, and the advertisement of oranges as a preventive of colds and influenza, increased the demand for, and the price of Jaffa oranges.

## INDUSTRY.

Further progress has to be recorded in industry. In several factories plant was enlarged and output increased ; the local market and Syria and Egypt are being steadily won.

A voluntary census taken by the Department of Customs, Excise and Trade in May, and embracing 3,800 factories and workshops (including 1,236 established before the War) yielded the following information. 2,429 establishments used hand labour, and 583 motor power ; 2,270 power driven machines were already at work. More than 18,000 persons were engaged, of whom over 16,000 were males ; 1,086 males and females were under 16 years. 10,200 were wage earners and 1,441 contract labourers, and the rest owners, clerks and technicians. The monthly sum total of the wages paid to daily wage-earners averaged £P.37,545, and of salaries of clerks, technicians and contract labourers £P.16,361. The average monthly expenditure on raw materials during the buying-in season exceeded £P.300,000 ; the aggregate net output for 1927 was estimated at £P.3,885,000, and invested capital (land, buildings, machinery, and working capital) is reckoned at over £P.3,700,000.

An unusually poor olive crop adversely affected the oil and soap trade, and soapboilers were compelled to import unrefined oils. 5,164 tons of laundry soap, value £P.223,923, were exported, compared with 5,316 tons, value £P.233,013, in 1927. 10 tons more of toilet soaps were exported. Exports of olive oil fell seriously, from £P.68,468 in 1927 to £P.12,530. The production and export of edible oils from imported seeds are, however, progressing ; £P.11,061 of sesame and £P.10,928 of sunflower seed oil were shipped from Palestine, compared with £P.2,560 and £P.4,645 in 1927, together with, for the first time, £P.1,336 worth of vegetable butter substitutes.

The Nesher cement factory is also working at full capacity ; it exported 11,459 tons, mainly to Syria, compared with 9,015 tons in 1927. The factory supplies the local market almost entirely, with the result that import, of cement in 1928 decreased by some 9,000 tons, value £P.24,759.

The silicate brick factory of Tel-Aviv, which closed down after the slump of 1926, has resumed work.

Millers suffered from the crop failure, and the competition of cheap foreign wheat and flour forced some small mills out of business. There are now 200 mills at work, employing 976 hands. While the exports of unleavened bread decreased by £P.1,346 the local manufacture of biscuits and cakes, finding ready sales in Syria, is gaining ground, and there is no longer such a large importation of the cheaper qualities.

The area under tobacco cultivation was 7,926 dunums, compared with 10,305 dunums in 1927, and the yield of tobacco and tombac was 322,322 kilogrammes, compared with 546,742 kilogrammes. The manufacture of cigarettes, cut tobacco and tombac is firmly established ; there are 15 factories and two export factories, employing 781 persons, and having an invested capital of about £P.350,000,

## STATISTICS OF OUTPUT.

Year	Cigarettes Kilos	Cut tobacco Kilos	Tombac Kilos	Snuff Kilos
1926 .. .. .	379,078	27,387	81,797	—

1928 .. .. .	493,715	16,020	84,071	57

Locally-made cigarettes are much more generally smoked, and imports are declining, with the exception of certain high-class brands. Machine-made cigarettes are also displacing cut tobacco in rural favour.

The export of wines rose by 250 tons, value £P.9,500, and there is a larger local consumption. The export of liqueurs is also increasing.

An amalgamation of the two leading factories has led to an improvement in the quality of local chocolate, and a reduction in imports of the cheaper brands. A small export trade in cocoa is being established.

The textile industry again had a good year. Local stockings are supplanting Japanese and other cheap imports, and find a market in neighbouring territories : the exports were valued at £P.17,532, compared with £P.12,618 in 1927. For the first time, woollen knitted goods, to the value of £P.1,008, were exported, and exports of other apparel realised the figure of £P.5,879. Most went to Syria. The ' Lodzia ' factory has established its own spinning plant.

The manufacture of upper and sole leather, and leather goods, is slowly advancing and capturing the local and neighbouring markets. A modern tannery, newly established at Yazur, employs some 40 workmen.

Artificial teeth are successfully made at Jaffa, and the whole output is sold abroad, to a value, in 1927, of £P.4,372.

Local foundries and workshops produce all sorts of spare parts and articles ranging from tools to iron pumps, and from metal bedsteads and bath stoves to refrigerators.

The demand for locally made furniture is growing, although competition from Syria is still keen.

The value of jasmin and other floral essences exported by the Benyamina factory was £P.2,420.

\* Owing to the wide variations in rates it is difficult to calculate a reasonable average for skilled and unskilled workers in industry. The industrial situation is unstable and this reacts upon wages ; moreover, differences in the size of industrial units, and the cultural and social distinctions in employers and employed cause rates to diverge sharply, although a growing approximation between the wages of Jewish and non-Jewish workers is apparent for skilled work ; for unskilled work there is a wider discrepancy. The higher money wages of Jewish workers, however, do not in many cases reflect a higher level of real wages.

URGENT TELEGRAMS—Urgent telegrams are accepted for most foreign countries at triple the rate for ordinary telegrams.

## CUSTOM HOUSE DECLARATION.

Two copies of the Customs declaration must be attached to the Despatch Note of every incoming foreign parcel. For outgoing foreign parcels the number of copies varies according to the country of destination but in no case is it less than two.

## UNDELIVERED PARCELS.

Undelivered parcels are disposed of according to the sender's instructions, which should be furnished on the reverse side of the Despatch Note. When such instructions are not furnished, the parcel is returned to origin at the expiration of one month from the date of receipt in Palestine.

## COLLECTION OF TRADE CHARGES.

### (REMBOURSEMENT SYSTEM.)

A "Cash on Delivery" Parcel Post Service with Great Britain and Northern Ireland and Egypt only is in operation. So far as posting in Palestine is concerned, the service is at present confined to the Offices of Jerusalem, Jaffa, Haifa, Nazareth and Bethlehem. In the reverse direction "Cash on Delivery" parcels may be addressed to any destination in Palestine.

### FEES PAYABLE AND TRADE CHARGE.

The sender must prepay, by means of postage stamps affixed to the Despatch Note, a special Cash on Delivery fee at the rate of 1 per cent. of the amount of the Trade Charge and a fixed fee of 10 mils per parcel. These fees are additional to the ordinary postage and other charges.

The maximum trade charge per parcel is £P.40.

## INSURANCE OF PARCELS AND BOXES.

Parcels may be insured to practically all countries which undertake such service.

The maximum amount for which a parcel can be insured varies according to the country of destination, but in no case may it exceed £P.120. A parcel may not be insured for an amount exceeding the real value of the contents and the cost of packing.

Insured parcels must be very strongly packed and sealed in accordance with the regulations.

The fee for insurance, including registration but in addition to the ordinary postage, is 20 mils for the first £P.12 or part thereof of the insured value and 7 mils for each additional £P.12 or part thereof.

Every insured parcel containing coin or bullion, watches, precious stones, jewellery, or any article of gold or silver, must be enclosed in a strong box or case (measuring, if the contents are jewellery exceeding £P.100 in value, at least 105 centimetres in length and girth combined), must be sewn up, or otherwise fastened, in a wrapper of linen, canvas, strong paper, or other substantial material and must have the address written on its actual covering. The seals must be placed along the edges of each join or loose flap at distances of not more than 75 millimetres apart.

Parcels may not exceed 10 kilogrammes in weight and for many countries, including Egypt, the maximum weight allowed is 5 kilogrammes.

The maximum length allowed is 105 centimetres.

The maximum length and girth combined, 180 centimetres.

Parcels addressed to foreign countries should generally be packed in tin, canvas, linen or similar material and with due regard to the length of journey, conditions of transit, climate, etc.,—not merely in paper or cardboard—and in a manner calculated adequately to protect the contents from damage through contact with other parcels.

An Advice of Delivery of a registered or insured parcel may be obtained on payment of the sum of 13 mils either at the time of posting or subsequently.

## INSURED BOX SERVICE (FOREIGN ONLY).

Articles of gold and silver, precious stones, jewellery and other articles of a like nature which are prohibited from transmission in insured letters, may generally be sent in the Letter Mails as insured boxes.

The undermentioned classes of articles are prohibited from transmission in insured boxes to Great Britain :—

Clocks, watches and the principal parts thereof.

Cinematograph films ; letters or notes which may serve as a substitute for correspondence. Current coin, bank-notes, securities, payable to bearer, bonds and articles included in the category of commercial papers. It is, however, permissible to insert in the packet an open invoice and also a simple copy of the address of the packet and the sender.

An insured box must not exceed 1 kilogramme in weight or measure more than 30 centimetres in breadth and 10 centimetres in depth. The sides of the wooden box must be at least 8 millimetres thick.

It must be tied round cross-wise with a single strong string (not two or more pieces joined together), the two ends of the string being held firmly together under a seal of fine wax bearing a private mark. All seals on the four sides of the packet must be identical with that used for sealing the ends of the string.

The boxes must not be wrapped in paper.

Insured boxes are subject to the Customs Regulations and must be accompanied by the appropriate forms, which should be most carefully prepared.

No box can be insured for more than its actual value or the limit of insurance allowed.

Postage and insurance fee must be fully prepaid.

The rate of postage is 8 mils per 50 grammes with a minimum charge of 40 mils. The fee for insurance and the limits of insurance are the same as for insured letters to places abroad.

An Advice of Delivery of an insured box may be obtained on payment of a fee of 13 mils either at the time of posting or subsequently.

(2) the minimum navigable depth, L.W.O.S.T. ?</p> <p>NOTE.—If between the entrance and the deep sea there are bars or shoals where a lesser depth occurs than the minimum indicated above, a list of such obstructions and of the depths over them (L.W.O.S.T.) should be given.</p>	<p>Open Roadstead.  No bar or entrance for large vessels. Small lighters and boats enter through passage in reef.</p>
<p>2. In the approach channel from bar or entrance to berthing accommodation, what is :—  (1) the minimum and maximum width ?  (2) the minimum and maximum depth, L.W.O.S.T. ?</p>	<p>Approach to anchorage from open sea.</p>
<p>3. What is :—  (1) the rise and fall of tides—  (a) ordinary springs ?  (b) ordinary neaps ?  (2) the rise of ordinary neaps above L.W.O.S.T. ?</p>	<p>—</p>
<p>4. What is the maximum available depth of water :—  (a) at piers or wharves, L.W.O.S.T. ?  (b) in the case of enclosed docks in the entrance locks, if any, and at dock quays, H.W.O.N.T. ?</p>	<p>Quays for lighters and small craft only. Subject to periodical silt and scour. Depths vary from 0 to 5 feet.</p>
<p>5. What are the respective lengths of piers, wharves, or (in the case of enclosed docks) dock quays, where the maximum depth of water, referred to in Question 4, exists ?  What percentage does the total of these lengths bear to the total accommodation at the port ?</p>	<p>—</p>
<p>6. What are the dimensions (length, loaded draught, and beam at that draught) of the largest vessels which under existing circumstances, can be :—  (a) berthed alongside any pier or wharf (L.W.O.S.T. ?)  (b) in the case of enclosed docks—  (1) admitted direct to ?  or  (2) admitted through the entrance lock of any important dock or docks, H.W.O.N.T. ?</p>	<p>Small vessels engaged in coasting trade can be accommodated alongside. (b) in the case of enclosed docks, at the entrance lock, if any, of any important dock or docks ?  (c) at the principal berths, to 40 feet at L.W.O.S.T. (in case of the berths at enclosed docks, H.W.O.N.T.) and is accommodation being provided for vessels, 1,000 feet in length and of 100 feet beam ?  If not, to what extent is deepening being effected, and for vessels of what dimensions (length draught, and beam at that draught) is accommodation being provided or in contemplation ?</p>	<p>—</p>

NOTE.—Vessels anchor in the open roadstead immediately west of a reef consisting of low lying rocks extending almost parallel with the coastline and providing shelter for lighters in winter. Cargo is discharged into open lighters which in turn discharge at quays situated behind the reef. Small sailing vessels engaged in the coasting trade are able to go alongside quays.
